

 H5 audits vision : network visibility technology

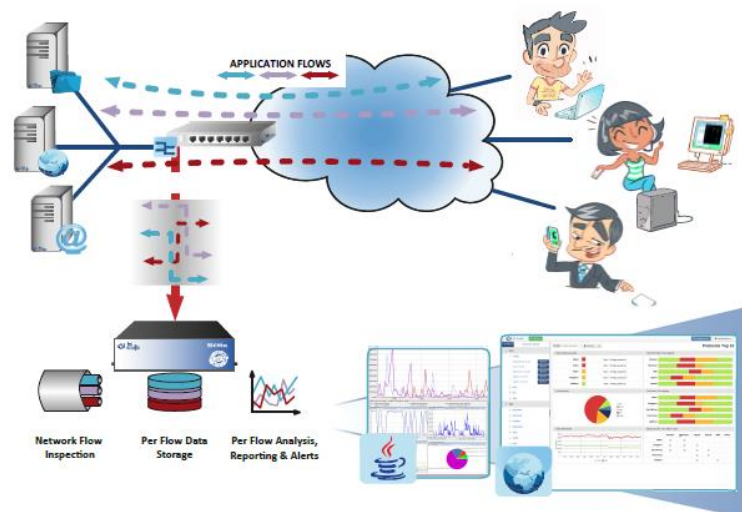

Thank to its 20 years experience in IT network audits, H5 audits has designed innovative technologies that enable enterprises, service providers and governments to enhance their global network and application visibility. With H5 Appliance, Corporations can deploy an “easy to use” and comprehensive software and hardware solution that allows the various teams to access IT information in an adapted format (in regards to their position and expertise). Using a common tool for IT Reporting allows to broadcast a clear and comprehensive information on applications behavior and trending of the network. H5-Appliance provides a powerful network visibility solution for Network operations center to pilot the IT, for network managers who are responsible for building and planning growth & IT changes and for the helpdesk interfacing and supporting users with IT issues on daily basis.

 H5 Appliance cc : Embedded rolling buffer:

The H5-100cc Appliance has additional resources storage 100% dedicated to Network traces storage and history. This new feature allows to drill-down on a specific traffic, or a selected IP or a monitored object to get the associated network trace on a past period; it can be easily exported in a pcap file format. Embedded rolling-buffer is available from 4.0 version. Please contact your sales department for upgrading older versions.

H5-Appliance : network visibility made safe, easy and cost effective

The H5-100cc Appliance is easily deployed on any network; it is installed on a 10/100/1000 Mbps port mirroring interface or a 10/100/1000 Mbps tap and do NOT require any network change or interruption. The H5-100cc Appliance requires no complex configuration and no architecture design; it inspects the traffic and extracts all required data in real-time. First report is delivered within few minutes along with network application data from Appliance implementation and deployment.

Performance

Packet Performance (pps)	15000 pps
Throughput Performance	50 Mbps
1 min / 5 min / 1 hour / 1 day Data storage	15 days / 1 month / 3 months/ 6 months
Monitored objects	100
Business Flows	50
VLAN	100
Rolling Buffer -cc	250 Go

Spécifications Matérielles

Dimensions (H x L x P)	140 mm x 300 mm x 400 mm
Weight (Rack)	1,9 Kg
Transport Box size (H x L x P)	TBC
Weight (Transport)	4 Kg
Operating Temperature	+0°C à +50°C / +32°F to +122°F
Operating relative humidity	10 à 90%, non - condensing
Safety, Approvals, Certifications	EMI : FCC, CE, BSMI, C-Tick Security : CB, BSMI, ETL
Certifications	FCC Class B
Number of power supplies	1
Power consumption	0.7A@220 VAC, 1,5@115 VAC
Back panel	1 x 10/100/1000 Ethernet port - capture 1 x 10/100/1000 Ethernet port - administration 1 x Serial port 1 x DVI port
